

It would be an extreme burden on KAKN to be required to record each and every hour of broadcasting. Along with all the equipment we would need to purchase, it would require hiring an individual to install, monitor, and log all the information. Our very, very small rural Alaska market could not afford such a financial burden.

As a Christian radio station, we would not come close to violating the supposed reason (indecentcy) for these rules.

Therefore, we should not be required to pay for something that would never reveal any indecent programming.
